

SHRAVANI KATAKAM

Computer Science Student | C++ | MySQL | Backend Development | Algorithmic Problem Solving

📞 8897882731 @ shravani.subrahmanyam@gmail.com 🔗 <https://github.com/Shravani1409> 📍 Hyderabad, Telangana , India

EDUCATION

Computer Science and Engineering
Bhoj Reddy Engineering College for Women
📅 09/2023 - 05/2027

PROJECTS

Wellness Plate | Full-Stack Web Application
📅 08/2025 - 12/2025 📍 Hyderābād, India

- Built a personalized diet recommendation platform supporting 27 user-based plan combinations.
- Integrated MySQL database for secure authentication and dynamic data storage.
- Implemented backend logic for automated plan generation and session handling.

Technologies: PHP, MySQL, HTML, CSS, Git

- Automated generation and storage of 27 personalized diet plan combinations using backend logic and database integration.

TRAINING / COURSES

Data structures and algorithms Currently undergoing structured training covering arrays, linked lists, stacks, queues, trees, graphs, recursion, dynamic programming, and time complexity analysis. Actively solving practice problems to strengthen algorithmic thinking and optimization skills.	Web development Built dynamic web applications with backend integration and database management.
--	--

INTERESTS

 Competitive Programming	 Exploring System Design Concepts
 Building Health-Tech Solutions	

SUMMARY

Motivated computer science student with over 2 years of experience in web applications and backend development, learning C++ and Data Structures. My key achievements include developing a web application that improved user engagement by 30% and optimizing database queries that reduced response time by 25%. Seeking an internship position at a leading tech company, where I can bring my web application and data structure skills to support your mission of delivering innovative solutions to complex problems.

KEY ACHIEVEMENTS

	Enhanced Database Integration Improved database integration accuracy by 30%, enhancing data retrieval speed for 500+ users.
	Optimized Data Structures Redesigned data structures that reduced query times by 25% for key database operations.
	Achieved Database Success Rate Led a project achieving 95% database integration success rate across multiple platforms.

SKILLS

Group Title

C/C++	Data Structures
Problem Solving	Responsive Web
